Issue of Interest

The UNVP research site at the Panhandle Research and Extension Center (PREC) has been targeted for removal. This project’s funding was deemed necessary to obtain data from the 2010 growing season before such removal would take place.

Approach to Problem

Funding was provided to the PREC to support labor and vehicle rental required for maintenance of the site during the 2010 growing season.

Goals/Achievement of Goals

Maintenance of the grape cultivar trial at the PREC throughout the growing season was desired, should the need arise for the PREC to remove this planting. The vineyard was maintained through harvest and data that were acquired will be forthcoming from Mr. James Schild, the Extension Educator who has overseen this project.

Results, Conclusions, Lessons Learned

We eagerly await the data acquired from this year’s growing and harvest season. The fate of the planting is yet to be determined. If the decision is to remove it, at least this project’s funding will have provided some useful final data prior to its demise.

Progress Achieved According to Outcome Measures

This portion is yet to be determined.

Financial Report

Personnel	\$	5,069
Vehicle rental	\$	405
Overhead	\$	518
Total	\$	6,000
